Delivery form	In breathable fabric sack for 200 or 500 m². Delivery by parcel service.
Quantity/ delivered unit	for 200 m² (Art. No. 31239): 66 g biodiversity annual for 500 m² (Art. No. 31244): 166 g biodiversity annual

Area of use

- For extensive and simple intensive green roofs with seeding (also pitched roof).
- All-year-round application possible, the best results are achieved when sowing in the period from the end of March to the beginning of May.
- Suitable as a complement to sedum shoot seeding.
- Suitable for E- and M-substrate in combination with germinating substrate.

Specific properties

- Quality of the seed mix in accordance with the requirements of the FLL guidelines for green roofs.
- Minimum purity of the seed mix over 75%.
- Minimum germination capacity over 70%.
- Carrier fabric to facilitate even seed distribution.
